Were the faculty members approachable and willing to guide during the hands-on sessions?

30 responses

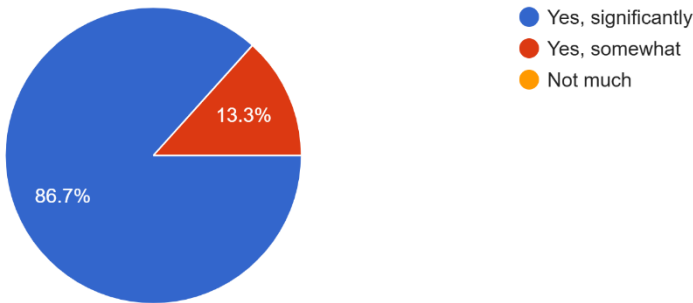

How would you rate the academic content delivered during the sessions?

30 responses

Did this workshop help in improving your confidence in performing USG- guided blocks?
30 responses

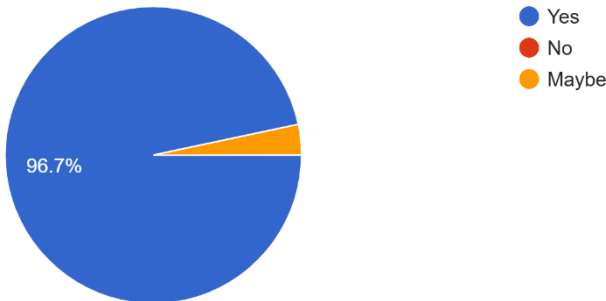

Any suggestions for improvement?

10 responses

- No
- Kindly include erector spinal , paravertebral, wrist and ankle block , scalp block
- Good
- Can make it a 2 day program
- You can give booklets to read procedure
- Kindly provide more time for needling and give more time which is difficult . Other wise excellent workshop and hopefully next Workshop will be soon . Thank you so much 🙏.
- Simple language should be used
As first year we were not well versed but they were expecting us to know things
- More frequent workshops to be taken
- A little bit more time explaining the cross sectional anatomy. Or if it is presented as a lecture because it was a bit difficult to hear what Diwan sir was saying for people at the back. The cross sectional approach was a very new concept for me and it certainly helped me understand blocks a bit better
- If hard copy of the material with imaging and theory would have been provided
It would have been a bit easier to revise after the workshop

Would you recommend this workshop to your colleagues?
